

SasquatchXC, or SXC for short, designs, manufactures, and sells expedition campers capable of accessing remote, rugged terrain. The 12V Electrical Assembly Technician will join a fast-growing team responsible for assembling campers and related products at SXC.

### Summary:

The 12V Electrical Assembly Technician assumes a crucial role in the assembly of expedition campers at SXC, focusing primarily on 12V electrical systems while also contributing to general assembly tasks. This position requires technical expertise and a strong commitment to customer service. Candidates must greet visitors warmly, conduct facility tours, and assist customers with their inquiries. Demonstrating integrity, reliability, and professionalism is essential, as is maintaining a collaborative and positive attitude.

### Essential Functions:

- Execute advanced assembly tasks including precise 12V wiring, soldering, and installation of electrical components such as inverters, chargers, solar chargers, fuses, and breakers.
- Build and install wire harnesses and electrical boards containing various components.
- Understand and apply solar charging wiring theory to ensure efficient integration of solar systems.
- Extend exceptional hospitality to visitors, providing detailed facility tours and promptly addressing customer inquiries.
- Troubleshoot electrical problems with Customers, either in person, or by phone, in a friendly manner.
- Assist with inventory management and communicate low inventory levels to Purchasing.
- Enforce Quality Assurance procedures and conduct thorough Quality Control inspections.
- Assist with improving quality control procedures and instructions.
- Create new processes to increase efficiency and improve Quality.
- Promptly report and address any assembly issues or discrepancies.
- Prioritize tasks to enhance productivity during the assembly process.
- Communicate effectively with management and colleagues.
- Maintain clean and organized workstations following 5S principles.
- Assist with other assembly tasks, including installation of trailer mechanical components.
- Take on additional responsibilities and support other departments as needed.

### Minimum Requirements:

- 2+ years of experience in 12V electrical assembly or installation.
- Associate's degree in Electronics or equivalent technical certification preferred.
- Experience in interpreting and executing detailed instructions and customer specifications.
- Proficiency in soldering techniques.
- Knowledge and experience with 12V electrical systems, wiring, and installation of electrical components.
- Competence in operating power tools safely and accurately.
- Strong mechanical aptitude and problem-solving skills.
- Ability to handle hand tools, testing equipment, and computers effectively.
- Adaptability to changes in work environment and procedures.
- Proactive communication skills for effective planning.

The most important skills you can bring to the job are a positive attitude, passion for Customer Service, ability to embrace and drive change, joy, fun and humor. If you possess these qualities, we are committed to providing comprehensive training.

**Compensation: Pay starts at \$21/hr depending on experience, with a 4x10 work schedule (Monday to Thursday).**
